

# Atif Şimşek

Jr Front-End Developer

## About

I was born in Sinop in 1995. I am a web developer using React. After becoming a top-level web developer, my goal is to move into the mobile field. I have no military service or any travel restrictions.

I have been developing myself in the front-end field for about 9-10 months. After reaching a certain level in Html Css and Javascript, I started learning React and making improvements. I use tools like Git, npm, vscode, and visual studio, and I am able to use packages like Redux, React-Router-Dom, Formik, Yup, and the Context Api.

I share the projects I have done on my github account. Below, I have shared some of the projects I have done.

## Projects

### Html-Css-Js Projects

Sample Website for Barber
