## About Me

After completing my master's degree and military service, I began working in front-end development about two years ago, continuously building my skills with technologies such as React, JavaScript, Next.js, Redux, and TypeScript. I started my career at NTT DATA Business Solutions after completing various training and bootcamp programs.

In my current role, I follow a sprint-based approach using the Scrum methodology. I develop user-friendly web applications that adhere to UI/UX principles and clean code standards, focusing on projects such as logistics management, monitoring systems, and management panels to meet customer needs.

For more information about me and my projects, please visit my website.

## Experience

<b>NTT DATA Business Solutions</b>	July 2023 - Present
------------------------------------	---------------------

## Projects I Worked On

<b>BSH Milkrun Project</b>	The Milkrun Logistics project focuses on order management, GPS tracking, and a notification system. A web application was developed for logistics management and tracking.
<b>BSH COSMOS Project</b>	The Cosmos Modernization project is an update of a global application focused on managing technical service processes for home appliances.
<b>BTS ESG Project</b>	BTS ESG is focused on environmental, social, and governance (ESG) elements. The project involved form creation, submission processes, and response collection.

## Skills

Html 5	Jira	Responsive Design
Css / Sass	Scss/Less	Agile Methodologies
JavaScript	Next.js	Context API
React	TypeScript	Rest API/JSON
Redux	Figma	Node Js
Tailwind	Git	OOP
MaterialUI	Bootstrap	Language
Ant Design	Dev Extreme	English B1

## Education

Sinop Anatolian High School	High School 2009-2013
Sakarya University	Turism Management / Bachelor's Degree 2014 - 2018
Sakarya University	Information Systems / Master's Degree 2018 - 2019
