2014 - 2018

Sakarya University

Information Systems / Master's Degree
2018 - 2019

Anadolu Üniversitesi

Computer Programming / Associate Degree
2021 - Continuing

About

I was born in Sinop, Turkey in 1995. I am a web developer using React. My goal is to become a top-level web developer and then progress into the mobile field. I have completed my military service and do not have any travel restrictions.

I have been developing myself about the front-end field about approximately 1+ years. After I reached a certain level in Html Css and Javascript, I started learning React and making improvements. Currently, I am trying to learn Next.js and TypeScript.

I share the projects which I have completed on my github account and my website. [Click for visit my website.](#)
Below are some of my completed projects for your review.

Project
