Redux	Npm
Tailwind	
Bootstrap	
C#	

Atıf Şimşek

Front-End Developer

About

   I was born in Sinop in 1995. I am a web developer using React. After becoming a top-level web developer, my goal is to move into the mobile field. I complated a military service. also, I don't have any travel restictions.

   I have been developing myself about the front-end field about approximately 1 years. After I reached a certain level in Html Css and Javascript, I started learning React and making improvements. I can use tools as like Git, npm, vscode, and visual studio, and I am able to use packages like Redux, React-Router-Dom, Formik, Yup, and the Context Api.

   I share the projects which completed on my github account and my website. **Click for visit my website**

As you wish you can examine some of the my projects as below.

Projects

Html-Css-Js Projects

Sample Website for Barber	**Click to Review**
Sticky Note App	**Click to Review**
