About

I was born in Sinop in 1995. I am a web developer using React. After becoming a top-level web developer, my goal is to move into the mobile field. I complated a military service. also, I don't have any travel restictions.

I have been developing myself about the front-end field about approximately 9-10 months. After I reached a certain level in Html Css and Javascript, I started learning React and making improvements., I started learning React and making improvements. I can use tools as like Git, npm, vscode, and visual studio, and I am able to use packages like Redux, React-Router-Dom, Formik, Yup, and the Context Api.

I share the projects which completed on my github account. As you wish you can examine some of the my projects as below.

Projects

Html-Css-Js Projects

Sample Website for Barber	Click to Review
Sticky Note App	Click to Review
Quiz App	Click to Review - Mobile Not Supported
