Tailwind	85%
Bootstrap	75%
C#	60%

About

I was born in 1995 in Sinop. I am developing web applications with React. My goal is to advance in the mobile field after reaching higher levels in the web. I have no military obligation and I have no travel restrictions.

I have been developing myself in the front-end field for about 9-10 months. After reaching a certain level in Html Css and Javascript, I started learning and developing with React. I use tools such as Git, npm, vscode, visual studio, and I am able to use packages such as Redux, React-Router-Dom, Formik, Yup and the Context Api.
I share the projects I have done on my github account. Below I have shared some of the projects I have done.

Projects

Html-Css-Js Projects

Sample Website for Barber	**Click to Review**
Sticky Note App	**Click to Review**
Quiz App	**Click to Review - Mobile Not Supported**

My Github Repositories for Other Html Css Js Projects ;
